BEYOND LITHIUM INC. (FORMERLY "BEYOND MINERALS INC.")

INTERIM MANAGEMENT'S DISCUSSION AND ANALYSIS
- QUARTERLY HIGHLIGHTS

FOR THE THREE AND SIX MONTHS ENDED JUNE 30, 2024

Prepared by:

BEYOND LITHIUM INC.

30th Floor – 360 Main Street, Winnipeg, Manitoba, R3C 4G1

Discussion dated: August 29, 2024

Introduction

The following Interim Management's Discussion & Analysis ("MD&A") of Beyond Lithium Inc. (formerly "Beyond Minerals Inc.") ("Beyond" or the "Company") for the three and six months ended June 30, 2024, has been prepared to provide material updates to the business operations, liquidity and capital resources of the Company since its last annual management discussion & analysis, being the Management's Discussion & Analysis ("Annual MD&A") for the fiscal year ended December 31, 2023. This MD&A does not provide a general update to the Annual MD&A, nor reflect any non-material events since the date of the Annual MD&A. The primary office of Beyond is located at 30th Floor – 360 Main Street, Winnipeg, Manitoba, R3C 4G1.

This MD&A has been prepared in compliance with section 2.2.1 of Form 51-102F1, in accordance with National Instrument 51-102 — Continuous Disclosure Obligations. This discussion should be read in conjunction with the Company's Annual MD&A, audited annual financial statements for the years ended December 31, 2023 and 2022, together with the notes thereto, and unaudited condensed interim financial statements for the three and six months ended June 30, 2024, together with the notes thereto. Results are reported in Canadian dollars, unless otherwise noted. The Company's unaudited condensed interim financial statements and the financial information contained in this MD&A are prepared in accordance with International Financial Reporting Standards ("IFRS") as issued by the International Accounting Standards Board and interpretations of the IFRS Interpretations Committee. The unaudited condensed interim financial statements have been prepared in accordance with International Standard 34, Interim Financial Reporting. Accordingly, information contained herein is presented as of August 29, 2024, unless otherwise indicated.

For the purposes of preparing this MD&A, management, in conjunction with the Board of Directors, considers the materiality of information. Information is considered material if: (i) such information results in, or would reasonably be expected to result in, a significant change in the market price or value of Beyond common shares; or (ii) there is a substantial likelihood that a reasonable investor would consider it important in making an investment decision; or (iii) it would significantly alter the total mix of information available to investors. Management, in conjunction with the Board of Directors, evaluates materiality with reference to all relevant circumstances, including potential market sensitivity.

Further information about the Company and its operations is available on SEDAR+ at www.sedarplus.ca.

Cautionary Note Regarding Forward-Looking Information

This MD&A contains certain forward-looking information and forward-looking statements, as defined in applicable securities laws (collectively referred to herein as "forward-looking statements"). These statements relate to future events or the Company's future performance. All statements other than statements of historical fact are forward-looking statements. Often, but not always, forward-looking statements can be identified by the use of words such as "plans", "expects", "is expected", "budget", "scheduled", "estimates", "continues", "forecasts", "projects", "predicts", "intends", "anticipates" or "believes", or variations of, or the negatives of, such words and phrases, or statements that certain actions, events or results "may", "could", "would", "should", "might" or "will" be taken, occur or be achieved. Forwardlooking statements involve known and unknown risks, uncertainties and other factors that may cause actual results to differ materially from those anticipated in such forward-looking statements. The forward-looking statements in this MD&A speak only as of the date of this MD&A or as of the date specified in such statement. Such forward-looking statements includes, without limitation, statements with respect to the Company's expectations, strategies and plans for the Eastchester-Fabie-Trudeau Property, including the Company's planned exploration; the results of future exploration, estimated completion dates for certain milestones and the Company's plans with respect to the Eastchester Fabie-Trudeau Property; the costs and timing of future exploration and development; future financial or operating performance and condition

Discussion dated: August 29, 2024

of the Company and its business, operations and properties, including expectations regarding liquidity and capital structure; the intended use of the net proceeds of the initial public Offering ("IPO"); and the adequacy of funds from the IPO to support the Company's business objectives, including with respect to its exploration, development and production activities.

Forward-looking statements are not a guarantee of future performance and is based upon a number of estimates and assumptions of management in light of management's experience and perception of trends, current conditions and expected developments, as well as other factors that management believes to be relevant and reasonable in the circumstances, as of the date of this MD&A or as of the date specified in such statement including, without limitation, assumptions about: favourable equity and debt capital markets; the ability to raise any necessary additional capital on reasonable terms to advance the exploration and development of the Company's properties and assets; the timing and results of exploration and development programs; the geology of the Eastchester-Fabie-Trudeau Property being as described in the Technical Report; the accuracy of budgeted exploration, development, operational and administrative costs and expenditures; operating conditions being favourable such that the Company is able to operate in a safe, efficient and effective manner; political and regulatory stability; the receipt of governmental, regulatory and third party approvals, licenses and permits on favourable terms; obtaining required renewals for existing approvals; requirements under applicable laws; sustained labour stability; stability in financial and capital goods markets; and the Company's ability to acquire and retain key personnel.

Forward-looking statements involve known and unknown risks, uncertainties and other factors that may cause the Company's actual results, performance, or achievements to be materially different from any of its future results, performance or achievements expressed or implied by forward-looking statements. Such risks include, without limitation: natural disasters, geopolitical instability or other unforeseen events; mineral prices are volatile and may be lower than expected; mining operations are risky; resource exploration and development is a speculative business; the successful operation of exploration activities at the Company's mineral properties depend on the skills of the Company's management and teams; operations during mining cycle peaks are more expensive; title to the Eastchester-Fabie-Trudeau Property may be disputed; Aboriginal title claims may impact the Company's interest in the Eastchester-Fabie-Trudeau Property; the Company may fail to comply with the law or may fail to obtain or renew necessary permits and licenses: compliance with environmental regulations can be costly; social and environmental activism can negatively impact exploration, development and mining activities; the mining industry is intensely competitive; inadequate infrastructure may constrain mining operations; the Company may incur losses and experience negative operating cash flow for the foreseeable future; the Company may be subject to costly legal proceedings; the Company will incur increased costs as a result of complying with the reporting requirements, rules and regulations affecting public issuers; the Eastchester-Fabie-Trudeau Property is located in an underdeveloped rural area; the Company may not use the proceeds from the IPO as described in this MD&A; the Company may not be able to obtain sufficient capital to pursue all of its intended exploration activities or continue on a going concern basis; and the Company may be negatively impacted by changes to mining laws and regulations.

Inherent in forward-looking statements are risks, uncertainties, and other factors beyond the Company's ability to predict or control. Please also refer to those risk factors referenced in the "Risks and Uncertainties" section below and the "Risk Factors" section of the final long form prospectus in respect of the IPO (the "Prospectus") filed and dated February 23, 2022. Readers are cautioned that the above does not contain an exhaustive list of the factors or assumptions that may affect the forward-looking statements, and that the assumptions underlying such statements may prove to be incorrect. Actual results and developments are likely to differ, and may differ materially, from those expressed or implied by the forward-looking statements contained in this MD&A.

All forward-looking statements herein are qualified by this cautionary statement. Accordingly, readers should not place undue reliance on forward-looking statements. The Company undertakes no obligation to update publicly or otherwise revise any forward-looking statements whether because of new information or

Discussion dated: August 29, 2024

future events or otherwise, except as may be required by law. If the Company does update one or more forward-looking statements, no inference should be drawn that it will make additional updates with respect to those or other forward-looking statements, unless required by law.

Description of Business

The Company was incorporated on October 8, 2019, under the laws of Canada. The Company is a natural resource company engaged in the acquisition and exploration of mineral properties in Canada. To date, the Company has not generated significant revenues from operations.

The Company has no revenues, so its ability to ensure continuing operations is dependent on the discovery of economically recoverable reserves, confirmation of its interest in the underlying mineral claims, and its ability to obtain necessary financing to complete the exploration activities, development, if they are proven successful, and future profitable production.

Beyond's goal is to deliver superior returns to shareholders by concentrating on the acquisition and exploration of mining properties. The Company currently plans to focus on its current property interests, as set out below under "Mineral Property Interests".

The Company will continue to attempt to raise capital to meet its ongoing operating activities.

Outlook and Economic Conditions

The Company is a Canadian base and precious metal exploration company, focused on exploring its current property interests, and on acquisitions of other mineral exploration properties, should such acquisitions be consistent with its objectives and acquisition criteria. The Company currently has operations in the Province of Quebec, Canada. The Company's financial success will be dependent upon the extent to which it can make discoveries and on the economic viability of any such discoveries. The development of such assets may take years to complete and the resulting income, if any, is difficult to determine with any certainty. To date, the Company has not produced any revenues. The sales value of any minerals discovered by the Company is largely dependent upon factors beyond its control, such as the market value of the commodities produced.

There are significant uncertainties regarding the prices of base and precious metal and the availability of equity financing for the purposes of exploration and evaluation. The future performance of the Company is largely tied to the successful exploration, discovery and eventual development of its property interests, if they are proven successful, and other prospective business opportunities and the overall financial markets. Financial markets are likely to be volatile, reflecting ongoing concerns about the stability of the global economy. However, recently, equity markets in Canada have showed signs of improvement, with equities increasing significantly during this period. Strong equity markets are favourable conditions for completing a financing, public merger or acquisition transaction.

Management regularly monitors economic conditions, estimates their impact on the Company's operations, and incorporates these estimates in both short-term operating and longer-term strategic decisions.

Highlights

 On January 9, 2024, the Company entered into a mineral property purchase agreement (the "Purchase Agreement") with Patriot Lithium Limited ("Patriot"), an Australian based mineral exploration company listed on the Australian Stock Exchange (ASX:PAT), pursuant to which the Company will transfer to Patriot an undivided 100% interest in the 61 mining claims comprising the Company's Borland East and

Borland North projects located approximately 60 km northwest of Frontier Lithium's PAK project in Northwest Ontario (the "Borland Claims").

As consideration for the Borland Claims, Patriot will issue to Beyond Lithium on closing, 1,100,000 fully paid ordinary shares in the capital of Patriot, subject to certain contractual escrow requirements (the "Purchase Price Shares"). Additionally, Patriot shall pay Beyond Lithium a cash payment of \$2,500,000 for an initial mineral resource estimate filed or announced by Patriot declaring any JORC, NI 43-101, or SK-1300 compliant, as applicable, deposits or orebodies contained exclusively in any part of the Borland Claims exceeding 20 million metric tonnes of contained Li2O with an average grade equal to 1.0% Li2O or greater.

- On February 25, 2024, the Company announced that it has agreed to settle debts relating to certain
 consulting fees owed to two arm's length parties by issuing an aggregate of 171,554 common shares
 of the Company at a deemed price of \$0.185 per share, representing an aggregate value of \$31,737
 (the "Debt Settlement").
- On March 31, 2024, the Company entered into a letter of intent (the "LOI") to amend the terms of the Greenfield Lithium properties Option Agreements and the Victory Projects option agreement. Pursuant to the LOI, option cash payments totaling \$481,400 will be converted into promissory notes bearing interest at 6% per annum and maturing on August 31, 2024. As consideration for deferring the cash payments, the Company issued to the vendors a total of 200,000 common shares of the Company at a price of \$0.14 per share on May 3, 2024.
- On April 24, 2024, the Company and its exploration team was awarded the prestigious 2023 Bernie Schnieders Discovery of the Year Award, presented by the Northwestern Ontario Prospectors Association, for the spodumene discovery at its Victory Project in Ontario, Canada.
- On April 26, the Company issued 1,010,300 common shares of the Company at a price of \$0.15 per share as the first anniversary share issuance in accordance with the March 30, 2023 option agreements.
- On May 24, 2024, the Company closed a private placement of 2,500,000 flow-through shares of the Company at a price of \$0.20 per share for gross proceeds of \$500,000. In connection with the Offering, the Company paid an eligible third party finder dealing at arm's length with the Company: (i) cash commissions totalling \$34,300; and (ii) an aggregate of 171,500 broker warrants, each exercisable to acquire one common share of the Company for 2 years at an exercise price of \$0.20 per share.
- During the six months ended June 30, 2024, 140,000 stock options were exercised at a price of \$0.15 per share for total proceeds of \$21,000.
- During the six months ended June 30, 2024, 2,441,277 warrants were exercised at a price of \$0.10 -\$0.15 per share for total proceeds of \$246,242.
- During the six months ended June 30, 2024, 386,666 RSUs were converted at a price of \$0.315 per share.

Events Subsequent to June 30, 2024

 Subsequent to the period ended June 30, 2024, 83,334 RSUs were converted at a price of \$0.315 per share.

Discussion dated: August 29, 2024

Overall Objective

The primary business objective of Beyond is the acquisition, exploration and evaluation of mineral properties in Canada. In furtherance of this objective, the Company established the following business strategy:

- Develop and implement a discretionary exploration budget on its property interests with a view to establishing a viable mineral deposit; and
- Capitalize on management's technical expertise and ability to identify, evaluate, and acquire exploration properties.

See "Risks and Uncertainties" below.

Trends

Management regularly monitors economic conditions and estimates their impact on the Company's operations and incorporates these estimates in both short-term operating and longer-term strategic decisions. Strong equity markets are favorable conditions for completing a public merger, financing, or acquisition transaction. Apart from these and the risk factors noted under the heading "Risks and Uncertainties", and "Outlook and Economic Conditions", management is not aware of any other trends, commitments, events, or uncertainties that would have a material effect on the Company's business, financial condition, or results of operations.

Off-Balance-Sheet Arrangements

As of the date of this MD&A, the Company does not have any off-balance-sheet arrangements that have, or are reasonably likely to have, a current or future effect on the results of operations or financial condition of the Company, including, and without limitation, such considerations as liquidity, capital expenditures and capital resources that would be material to investors.

Mineral Property Interests

Eastchester-Fabie-Trudeau Property, Quebec

On March 8, 2021, the Company entered into a purchase agreement with Reyna Silver Corp. (the "Vendor") setting out the terms and conditions upon which the Company acquired a 100% undivided interest in the 37 non-contiguous mining claims comprising the Eastchester-Fabie-Trudeau polymetallic project (the "Property"), located approximately 35 kilometres northwest of Rouyn-Noranda, Quebec. Pursuant to the purchase agreement, the Company issued 1,000,000 common shares in the share capital of the Company valued at \$50,000 to the Vendor and granted the Vendor a 1% net smelter return royalty on the Property pursuant to the terms and conditions of a Net Smelter Returns Royalty Agreement. There are no other underlying royalties registered against the mineral titles that the Company is aware of.

The Property consists of 37 mineral titles in three separate blocks as shown in the table below. Eastchester includes eight mineral titles covering 192.15 hectare ("ha"), Fabie includes 20 mineral titles covering 833.09 ha, and Trudeau includes nine mineral titles covering 359.63 ha. All mineral titles were acquired by map designation under the Mining Act (Québec) (the "Mining Act") and are recorded 100% to Beyond Minerals Inc. All of the Company's tenures are in good standing until at least November 19, 2024.

The Property lies within the Archean Abitibi Greenstone Belt adjacent to the Destor Porcupine Deformation Zone (DPDZ). The Eastchester block lies north of the DPDZ and is underlain primarily by massive to pillowed, tholeitic iron and magnesium basalt flows and related gabbro sills belonging to the Deguisier

Formation of the Kinojévis Group. The Fabie and Trudeau blocks lie south of the DPDZ within the Southern Volcanic Zone (SVZ) and are underlain by several sub-units of the Duprat-Montbray Formation (DMF) of the lower Blake River Group including massive to weakly-banded, pale green rhyolite flows with thin fragmental and flow-top breccias overlain by a monotonous sequence of massive, pale green andesite flows alternating with dark green, vesicular, often pillowed, more mafic flows. At Fabie the DMF rocks have been intruded by the synvolcanic quartz-feldspar porphyry Fabie Pluton. The DMF units are generally east-trending and dip steeply south and cut by semi-conformable diorite sills subparallel to DMF layers, and crosscutting dykes and small plugs that cut both the DMF rocks and the Fabie Pluton. Structurally the Fabie block is crosscut on the north by the regional scale Fabie Bay Shear Zone and by numerous NNE-trending brittle faults.

No work was done on the Eastchester and Trudeau blocks in 2022. Work was focused on defining and testing an orogenic gold-type drill target on the Fabie block. Historic prospecting initially identified the Lac Fabie Nord and Fabie Nord Ouest gold showings with 1.03 to 2.09gpt Au, and several rounds of sampling and two shallow drill holes confirmed the presence of anomalous gold values. Surface mineralization consists of narrow, gold-bearing quartz-carbonate veinlets in the weakly sheared, Fabie Pluton quartz-feldspar porphyry. The revised Technical Report dated August 31, 2021 confirmed the historical results with three of four grab samples assaying greater than 0.50gpt Au up to a maximum of 3.19gpt Au. An induced polarization-resistivity survey in 2017 detected chargeability anomalies near the gold showings.

In September 2022, Prospectair Geosurveys Inc. flew a 91-line kilometre, high-resolution heliborne magnetic and time domain electromagnetic survey over the Fabie block on behalf of the Company. The Fabie Pluton was defined as a strong magnetic high with sharp edges, and a southeast-trending magnetic low within the Fabie Pluton was delineated. The Lac Fabie Nord and Fabie Nord Ouest gold showings were found to lie within this magnetic low and they were also found to roughly correspond to the IPF-08 chargeability anomaly defined in 2017. A five-hole, 627-metre, NQ-diameter drill program was completed in early November 2022 to test a 2D-inversion chargeability model for anomaly IPF-08 in the immediate vicinity of the two historical gold showings.

On January 19, 2023, the Company announced results of the drill program. Gold mineralization was encountered in narrow zones associated with strong silicification and quartz vein stockworks with hematitic selvages containing coarse pyrite and pyrrhotite.

Discussion dated: August 29, 2024

Mark Fekete, a Qualified Person under the definition of National Instrument 43-101 registered as a Professional Geologist in Quebec, has verified the technical data and approved the technical disclosure contained herein for the Eastchester-Fabie-Trudeau Property.

Favourable Lake Greenstone Belt, Ontario

On September 2, 2022, Beyond announced on that it had staked 114 claims covering an area of 2,220 hectares located approximately 190 km north of Red Lake, in the Borland Lake, Favourable Lake, and Gorman River areas of Northwestern Ontario, adjacent to Midex Resources' Berens Project and located near Frontier Lithium Inc. (TSXV: FL) PAK Lithium Property. The claims are located within the Favourable Lake greenstone belt, which surrounds the historic Berens River Mine and contains many untested gold, base metal and lithium occurrences.

The area has an exploration history dating back to the late 1920s; however, it has been subject to only spatially limited ground exploration. Most exploration in the area, including surface drilling and underground development and drilling, has been concentrated on the historical Berens River Mine No. 1 vein, the subparallel unmined No. 3 vein, and the immediate surrounding area. Between 1939 and 1948, Berens River Mines processed 560,707 short tons of mill feed at a rate of approximately 204–250 tons per day from the No. 1 vein, producing 157,339 ounces of gold, 5,684,360 ounces of silver, 4,129,766 pounds of lead, and 740,567 pounds of zinc (see the NI 43-101 technical report on the Berens River Project, dated October 15, 2021, prepared for Midex Resources Limited by qualified person lan Trinder, M.Sc., P.Geo.).

Peggy Group Lithium Property, Ontario

On January 24, 2023, the company announced the acquisition of a 100% undivided interest in 15 contiguous mining claims comprising the Peggy Group Lithium property located approximately 80 km north of Sioux Lookout, in the province of Ontario. Pursuant to the Purchase Agreement, Beyond Minerals paid to the vendor aggregate cash consideration of \$125,000, issued a total of 2,500,000 common shares of the Company, and assumed a 1.5% net smelter return royalty on the claims comprising the property, one-third of which may be repurchased by the Company for \$600,000 to reduce the royalty to 1.0%.

The Property covers approximately 7,386 hectares (73.9 km²). It is located approximately 80 km north of Sioux Lookout, Ontario, is easily accessible year-round by way of well-maintained highway and logging roads and features good outcrop exposure. The Property is located 8 km south of the McCombe-Root Lithium project owned by Green Technology Metals (ASX: GT1), which has announced high grade lithium results from their 24,000 m drill program on the project in recent months, new spodumene bearing pegmatite dyke discoveries in the area of the project, and the commencement of baseline environmental studies, all of which highlights the importance of this emerging pegmatite field. The McCombe-Root Lithium project has a historic resource of 2.297 Mt grading 1.3% Li₂O (Mulligan R., Geological Survey of Canada, 1965).

North Trout Lake Lithium Property, Ontario

On February 28, 2023, the Company announced that it was increasing its land position near Frontier Lithium's PAK project with the acquisition of a 100% undivided interest in the 179 contiguous mining claims covering approximately 3,490 hectares (34.9 km2) comprising the North Trout Lake lithium property located approximately 30 km southwest of Sandy Lake, in the province of Ontario (the "Property").

The Property is located approximately 9.5 km east of the Company's other lithium properties (totaling 2,220 hectares) in the Borland Lake, Favourable Lake, and Gorman River areas of Northwestern Ontario, approximately 37 km north of Frontier Lithium Inc.'s (TSXV:FL) PAK and Spark deposits, and approximately 15 km north of Frontier Lithium's spodumene-bearing pegmatite at Pennock Lake. The Pak deposit has a

Three and Six Months Ended June 30, 2024

Discussion dated: August 29, 2024

mineral resource of measured, indicated, and inferred categories of 9.3Mt (million tonnes), averaging 2.06% Li_2O and the Spark deposit has a mineral resource estimate of 14.4Mt, averaging 1.4% Li_2O (Frontier Lithium Inc., NI 43-101 Technical Report, PAK Project, PAK, Red Lake Mining District, Ontario, Canada, prepared by BBA with an effective date of April 5, 2021). Frontier Lithium also recently announced a significant expansion of its Pennock Lake pegmatite, with three grab samples grading 1.7%, 1.7% and 3.0% Li_2O .

Greenfield Lithium Properties, Ontario

On March 31, 2023, the Company acquired 57 high potential greenfield lithium properties totaling 125,751 hectares via a series of multi-property option agreements (the "Option Agreements") and acquired through staking three properties totalling 9,104 hectares. Pursuant to the Option Agreements, to acquire a 100% interest in the properties, the Company is required to:

- within 5 business days of the date of the Option Agreements, make cash payment of \$420,000 and issue 1,880,000 common shares;
- on or before the first anniversary of the date of the Option Agreements, make cash payment of \$590,000 and issue 2,490,000 common shares;
- on or before the second anniversary of the date of the Option Agreements, make cash payment of \$1,080,000 and issue 3,210,000 common shares; and
- on or before the third anniversary of the date of the Option Agreements, make cash payment of \$1,260,000 and issue 3,745,000 common shares.

Upon acquiring a 100% interest in any of the properties, the Company shall grant the optionors a 2.0% NSR on such properties, one-half of each of which may be repurchased by the Company for \$1,200,000. In addition, the Company shall pay the optionors a \$1,000,000 milestone payment, payable in cash or shares at the option of the Company, for each initial mineral resource estimate filed by the Company in respect of a deposit comprising part of the properties that discloses a deposit or orebody exceeding 5,000,000 metric tonnes with an average grade equal to 1.0% lithium oxide or greater.

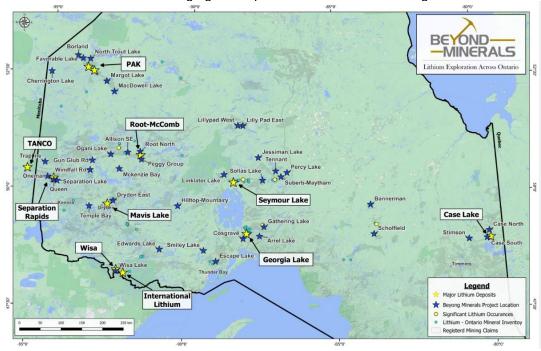

Figure 1 – Location of projects across Ontario

https://images.newsfilecorp.com/files/8620/160735 3209b1a1e4b7fb75 003full.jpg

The Company expects to focus on the following prime exploration areas for 2023:

- MacDowell (4,137 hectares) and Margot Lake (1,393 hectares) properties in the Frontier Lithium district;
- Cosgrave (6,269 hectares) and Gathering Lake (6,948 hectares) properties in the Georgia Lake district;
- Case Lake North (7,476 hectares), Case Lake South (2,711 hectares), and Stimson (1,630 hectares) properties in the Case Lake district;
- Wisa Lake (6,549 hectares) property;
- Temple Bay (5,111 hectares) and Laval (1,042 hectares) properties in the Dryden district;
- Sollas Lake (6,522 hectares), Tennant Lake (3,544 hectares), Maytham (7,400 hectares) and Superb North (2,054 hectares) properties in the Eastern English River district;
- Mountairy (7,503 hectares) and Hilltop (4,203 hectares) properties; and
- Scholfield (6,346 hectares) property in the Hearst district.

On May 15, 2023, the Company announced the commence of the 2023 exploration program that will be carried out in 2 phases. The Phase 1 exploration program is to assess its 64 projects totaling over 150,000 hectares (Figure 1). All data collected from the Phase 1 exploration program will be integrated into the existing database for interpretation and used to prioritize projects for the Phase 2 program planned later this field season. The Phase 2 program will include detailed geological mapping and sampling of the selected projects. The key objective of the Phase 2 program will be to define potential drill targets.

On Jun 15, 2023, the Company provided an update on the ongoing 2023 Phase 1 exploration program that has now prospected a total of 25 properties encompassing a combined 78,061 hectares. Over 350 grab and channel samples have been collected from the different properties thus far and 290 of them have been submitted to the lab for analysis. An initial compilation of field data and outcrop mapping show possible mineral zonation with tourmaline, garnet, and beryl locally in a several properties including the Temple Bay (5,110 hectares), the Cosgrave Lake (6,269 hectares), and the Laval (1,041 hectares) properties.

Figure 2 - Channel Sampled Beryl-Bearing Pegmatite Outcrop from the Cosgrave Lake Property

The relogging program of historical drill core of the Sollas Lake property's (4,730 hectares) was completed and will finish relogging and sampling four more historical drill cores from the Oneman Lake property (578 hectares).

On Aug 1, 2023, the Company announced the discovery of a new LCT pegmatite intrusive stock – also known as a fertile pluton – at its Cosgrave Lake project. The new discovery was named the Allan Graeme ("AG") Pluton in recognition of those individuals who played a significant role in its discovery. This discovery shares similarities with three significant lithium discoveries in the Georgia Lake District, namely the MNW pluton, the Barbara Lake pluton, and the Pine Portage pluton. These well-known fertile plutons in the district are associated with prolific lithium pegmatite belts. The AG Pluton at Cosgrave Lake therefore presents a significant opportunity for Beyond Lithium. The size and geochemical characteristics of the AG Pluton indicate its potential as a source of concentrated fluids, volatiles, lithium, and rare earth minerals, making it an exceptionally promising area for further exploration.

Following this important discovery at the Cosgrave Lake project, in order to secure the entire area, the Company expanded the Cosgrave Lake project's footprint by 2,036 hectares through additional staking. With this expansion of the Cosgrave Lake project on the west side of the original property, the Cosgrave Lake project currently has an area of 9,424 hectares exploration with an 11 km prospective corridor along the NE and SW trend.

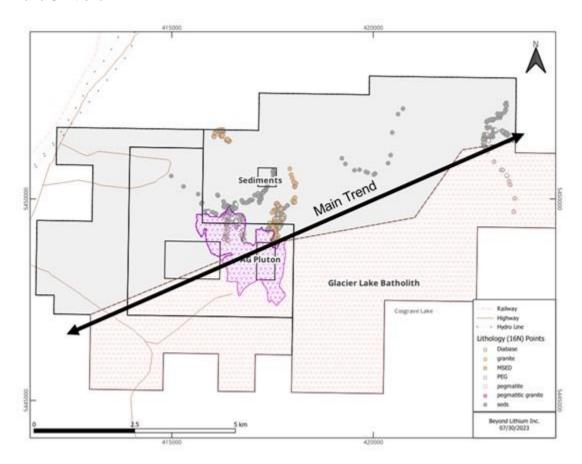

Figure 3 – Geological Map of the Cosgrave Lake Project Outlining the 11 km Main NE-SW Trend
Conformable to the Sediment Contact

On Aug 24, 2023, the Company announced the detailed sampling and mapping at the Gathering Lake South project led to the discovery of three new beryl-bearing pegmatites with elevated Li muscovite samples assayed up to 1,477 and 2,075 ppm (0.148% and 0.208%) in lithium. The Company also identified and mapped fifteen new pegmatites and established two new trends following the regional batholith-sediment contact orientation at the Gathering Lake South project.

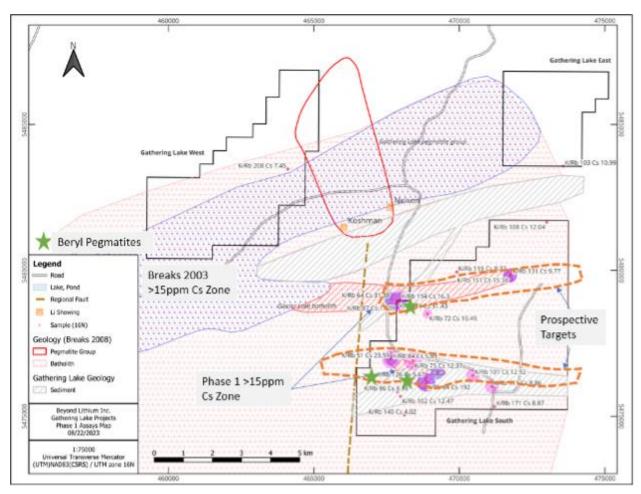

Figure – 4 Gathering Lake Projects Exploration Trends and New Beryl Pegmatite Locations

The Company's field crew prospected three projects in the Case Lake area including the Stimson (1,630 ha), the Case Lake South (2,711 ha), and the Case Lake North (7.476 ha) projects last week and was able to locate and sample a few prospective pegmatites at the Case Lake South and North projects. This short program allowed us to assess the accessibility of the three projects and the few samples we collected will give us a baseline for geochemistry of the projects.

A LiDAR survey was completed for the Wisa Lake Lithium project next to the Green Technology Metals' (ASX: GT1) Wisa Project. The final has been delivered for interpretation. The LiDAR data will be a useful exploration tool for identifying potential outcrop and structure on the project. LiDAR is a remote sensing method that is utilized to create digital terrain (DTM) and DEM of the landscape. As the topography of the area is generally flat, a subtle change to elevation high may indicate pegmatite outcrops or features worthwhile to prospect. The Beyond Lithium team will begin the interpretation of the LiDAR data and shortly come up with an exploration plan for the Wisa Lake Project.

On September 18, 2023, the Company announced the discovery of a new spodumene-bearing pegmatite zone at its 206 sq. km Ear Falls Project in Northwest Ontario. Grab samples have assayed up to 4.54% Li2O and a minimum 3-km-long prospective trend has been identified; a highly fractionated sample located 2 km northeast of the spodumene pegmatite zone establishes a minimum of 3 km long trend for spodumene bearing pegmatites exploration. This 3 km long trend lies within a 13 km long structural controlled corridor along the granite-metasedimentary contact.

The discovery has delineated two high priority areas for exploration:

- 1- Explore along the main metasedimentary-batholith structure and the major regional fault and look for subparallel spodumene pegmatite dykes.
- 2- Explore for additional prospective structure along the newly mapped metasedimentary-batholith in the northwest and look for additional spodumene pegmatite dykes.

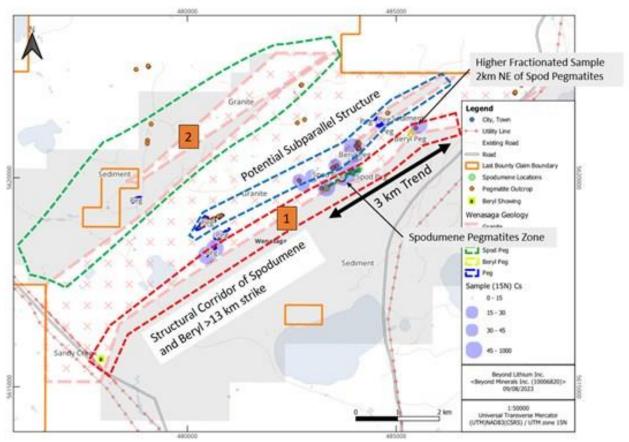

Figure 5 – Overview of the High Priority Areas for Exploration at the Ear Falls Project

Lawrence Tsang, VP Exploration of the Company, a Qualified Person under the definition of National Instrument 43-10, has verified the technical data and approved the technical disclosure contained herein for the Ontario Mineral Property Interests.

On October 10, 2023, the Company announced that it has entered into an option agreement with Bounty Gold Corp. ("Bounty Gold") and Last Resort Resources Ltd. ("Last Resort") to acquire 100% of the Victory Project (7,873 ha) and the Victory West Project (8,808 ha) (together the "Victory Project") situated in the Dryden-Ear Falls region of Ontario. The Victory Project is located just 40 km east of Kenora and 70 km west of Dryden with excellent nearby infrastructure including:

- Pacific Railway (CP Rail) and network along the southern claim boundaries of the Victory Project
- Access via Trans-Canada Highway and Highway 17 that connect to Kenora and Thunder Bay
- 20-minute commute time from the nearest town of Vermilion Bay
- Power line along Highway 17

On November 20, 2023, the Company updated the exploration work at the Cosgrave Lake Project indicate the proximity to the potential discovery of a higher-grade lithium spodumene zone. The Phase 2 program successfully delineated a mineral zonation around the AG pluton transitioning from a pegmatitic textural border zone to a beryl zone and to a green muscovite zone (Figure 4). Just outside of the green muscovite zone located the furthest away from the AG pluton to the northeast, a grab sample from a pegmatite composed of quartz, feldspar, and alluaudite minerals returned with 0.39% Li2O (1,832ppm Li) and 2.77% Mn (Figure 6).

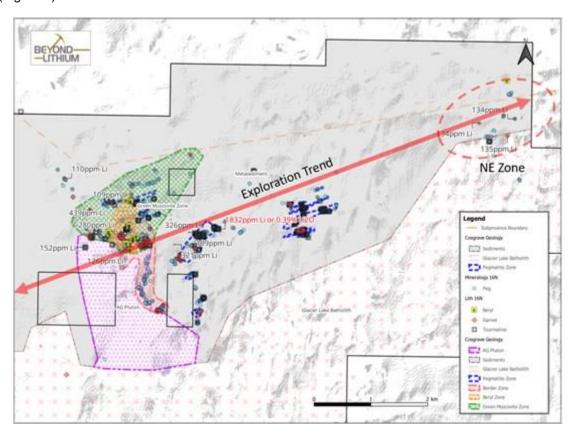

Figure 6 – Map of the Northeast Zone in Relation to the Overall Exploration Trend and the Main AG
Pluton Zone

On November 30, 2023, the Company reported the results of fourteen grab samples from its two newly discovered spodumene-bearing pegmatites at the Victory Project. The spodumene-bearing pegmatite located in the western side of the Project, the Last Resort Pegmatite, assayed up to 5.11% Li2O, and all 11 announced sample results are above 1% Li2O. The other spodumene-bearing pegmatite located in the eastern side of the Project, the Bounty Gold Pegmatite, assayed up to 3.48% Li2O. These two spodumene-bearing pegmatites are five kilometers apart and lie within a six kilometres long exploration corridor that is controlled by the regional English-River Subprovince and Wabigoon Subprovince boundary and local metasediment-metavolcanics contacts.

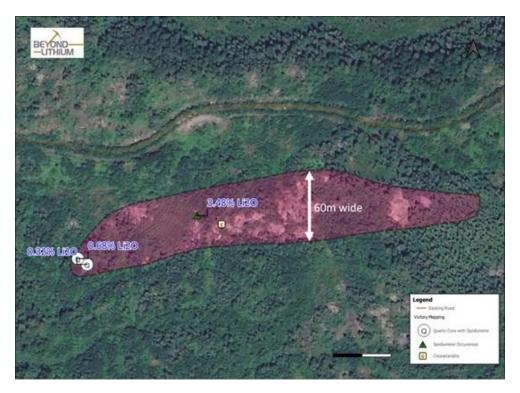

Figure 7 – Bounty Gold Pegmatite Mapped Spodumene, Cleavelandite, and Quartz Cores in relation to Samples

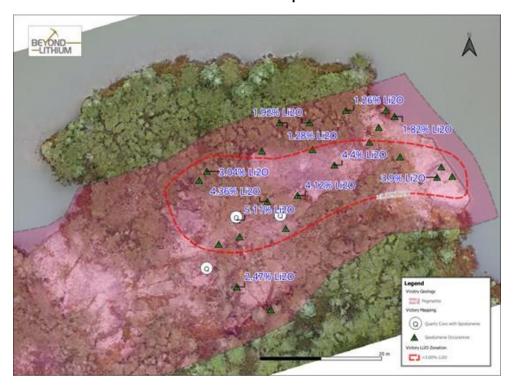

Figure 8 – Last Resort Pegmatite Mapped Spodumene and Quartz Cores in relation to >3.00% Li20 Zonation

Discussion dated: August 29, 2024

On December 19, 2023, the Company announced the results of a comprehensive exploration program at its Ear Falls spodumene project which confirm the potential of this recent discovery. The work recently completed at Ear Falls consisted of:

- A stripping program designed to expose the extension of the spodumene pegmatites in alldirections and to potentially uncover more subparallel dykes
- A reconnaissance drilling program targeted to further understand and delineate the characteristics and the densities of these subparallel spodumene pegmatite dykes
- An exploration and sampling program along the identified 13 km lithium exploration corridor.

Based on the preliminary findings from the field, the pegmatites at Ear Falls trend wider and denser towards the southwest orientation. A grab sample from pegmatite of over 5 meters in width located two kilometers southwest of the Wenasaga North Zone assayed up to 0.24% Li2O. The Sandy Creek West Zone located about seven kilometers southwest of the Wenasaga North Zone included three grab samples assaying over 0.10% Li2O and up to 0.40% Li2O.

The Ear Falls Project is comprised of over 20,000 hectares of area and the footprint of the 13 km long exploration corridor only accounts for 10% of the total surface area of the Ear Falls Project. Beyond Lithium will continue to explore for additional of spodumene-bearing pegmatites along the 13 km long exploration corridor and at the same time will prospect for other subparallel structures across the project by incorporating the geological and geochemical background established from the 2023 program.

On December 22, 2023, the Company provided an update of the successful submission of the exploration permit applications for both the Victory Project and the Ear Falls Project to the Ontario's Ministry of Mines. Each application is for 30 drilling sites and 20 stripping locations. Each drill site is designed to drill multiple holes. The stripping locations are focused on each project's main exploration corridors.

Financial Highlights

Financial Performance

Three Months Ended June 30, 2024, Compared with Three Months Ended June 30, 2023

Beyond's net loss totaled \$656,637 for the three months ended June 30, 2024, with basic and diluted loss per share of \$0.02. This compares with a net loss of \$1,354,491 with basic and diluted loss per share of \$0.05 for the three months ended June 30, 2023. The decrease of \$697,854 was principally because:

- Exploration and evaluation expenditures decreased to \$338,460 (2023 \$778,519) mainly due to the acquisition of various lithium properties in Ontario in the prior year.
- Marketing decreased to \$66,188 (2023 \$111,329) due to decreased advertising and promotion.
- Share-based compensation decreased to \$42,434 (2023 \$218,905). Share-based compensation
 will vary from period to period depending upon the number of options, warrants, SARs and RSUs
 granted and vested during a period and the fair value of the options calculated as at the grant date.

Discussion dated: August 29, 2024

Six Months Ended June 30, 2024, Compared with Six Months Ended June 30, 2023

Beyond's net loss totaled \$1,133,433 for the six months ended June 30, 2024, with basic and diluted loss per share of \$0.03. This compares with a net loss of \$3,336,245 with basic and diluted loss per share of \$0.14 for the six months ended June 30, 2023. The decrease of \$2,202,812 was principally because:

- Exploration and evaluation expenditures decreased to \$505,225 (2023 \$2,261,992) mainly due to the acquisition of various lithium properties in Ontario in the prior year.
- Marketing decreased to \$103,741 (2023 \$235,461) due to decreased advertising and promotion.
- Professional fees decreased to \$128,763 (2023 \$194,266) due to decreased audit, and legal fees.
- Share-based compensation decreased to \$226,000 (2023 \$390,811). Share-based compensation
 will vary from period to period depending upon the number of options, warrants, SARs and RSUs
 granted and vested during a period and the fair value of the options calculated as at the grant date.
- Gain on sale of mineral property increased to \$227,309 (2023 \$nil) due to the sale of the Borland Claims to Patriot Lithium Limited and the sale of the Fabie Gold project to Extreme Exploration Inc. during the current period. There was no sale of mineral properties in the prior period.
- Unrealized loss on marketable securities increased to \$123,212 (2023 \$nil) due to the decrease in fair value of the common shares of Patriot Lithium Limited held by the Company.

Cash Flow

On June 30, 2024, the Company had cash of \$282,893 (December 31, 2023 - \$76,288). The increase in cash of \$206,605 was a result of cash inflow from financing activities of \$806,036, partially offset by cash outflow in operating activities of \$599,431.

Operating activities were affected by net loss of \$1,133,433, adjusted by non-cash adjustments of \$249,836 and non-cash working capital items of \$284,166. Non-cash adjustments mainly consisted of share-based compensation of \$226,000, shares issued for mineral properties of \$179,545, unrealized loss on marketable securities of \$123,212, partially offset by a gain on sale of mineral property of \$227,309 and flow-through share liability recovery of \$52,994. Non-cash working capital items consisted of an increase in accounts payable and accrued liabilities of \$94,569, a decrease in sales tax recoverable of \$40,484, and a decrease in prepaid expenses of \$149,113.

Financing activities were affected by proceeds from private placement of \$500,000, proceeds from sale of mineral property interests of \$50,000, proceeds from promissory notes of \$40,000, stock options exercised of \$21,000, warrants exercised of \$246,242, and partially offset by share issue costs of \$51,206.

Liquidity and Financial Position

The activities of the Company, principally the acquisition, exploration, and evaluation of mineral properties, are financed through equity offerings and the exercise of warrants or options. The Company continues to seek capital through various means including the issuance of equity and/or debt.

The Company has no operating revenues and therefore must utilize its current cash reserves and other financing transactions to maintain its capacity to meet ongoing discretionary and committed exploration and operating activities.

Discussion dated: August 29, 2024

On June 30, 2024, the Company had a working capital surplus of \$192,087 (December 31, 2023 - \$221,765).

On June 30, 2024, the Company has no debt other than promissory notes payable of \$41,523 and flow-through share liability of \$159,506. Its credit and interest rate risk are minimal and amounts payable and other liabilities are short term and non-interest bearing. The promissory notes bear interest at 10% per annum payable on or before the maturity date of December 31, 2024.

The Company's use of cash at present, and in the future will occur, principally in two areas, namely, funding of its general and administrative expenditures and funding of its exploration on its mineral properties.

The Company intends to use the net proceeds from the IPO (i) to fund exploration and development activities on the Eastchester-Fabie-Trudeau Property; (ii) to complete Phase I of the work program recommended pursuant to the Technical Report (see "Recommendations" section of the Technical Report); and (iii) to complete Phase II of the work program recommended pursuant to the Technical Report in the event that the results of the Phase I exploration program warrant conducting same (see "Recommendations" section of the Technical Report), as indicated in the following table:

Principal Purposes	Funds to be Used ⁽¹⁾	Spent as at June 30, 2024	Difference
Completing Phase I of the work program recommended pursuant to the Technical Report (2)	\$155,320	\$64,396	\$90,924
Completing Phase II of the work program recommended pursuant to the Technical Report (2)(3)	\$230,079	\$98,165	\$131,914
Total	\$385,399	\$162,561	\$222,838

Notes:

- (1) The Company intends to spend the funds available to it as stated in this MD&A. There may be circumstances, however, where for sound business reasons a reallocation of funds may be necessary.
- (2) See "Material Property Recommendations" section of the Prospectus for a summary of the work to be undertaken and a breakdown of the estimated costs.
- (3) The Phase II work program is contingent upon positive results being obtained from the Phase I work program on the Eastchester-Fabie-Trudeau Property.

The Company intends to use the net proceeds from the private placement closed on February 2023 (the "Offering") (i) for acquisitions of lithium assets; (ii) to fund exploration and development activities on various Ontario lithium properties (the "New Properties"); (iii) and for general and working capital purposes. As at June 30, 2024, the Company had spent \$872,800 cash payment for the acquisition of various properties.

The Company intends to use the gross proceeds from the private placement closed on May 2023 (the "2023 Flow-Through Offering") to incur eligible "Canadian exploration expenses" that will qualify as "flow-through critical mineral mining expenditures" as such terms are defined in the *Income Tax Act* (Canada) related to the Company's projects in Ontario. As at June 30, 2024, the Company had spent \$1,382,300 as part of the flow-through funding agreements for shares issued on May 12, 2023 and met its expenditure commitments.

The Company intends to use the gross proceeds from the private placement closed on May 2024 (the "2024 Flow-Through Offering") to incur eligible "Canadian exploration expenses" that will qualify as "flow-through critical mineral mining expenditures" as such terms are defined in the *Income Tax Act* (Canada) related to the Company's projects in Ontario. As at June 30, 2024, the Company had spent \$124,691 as part of the flow-through funding agreements for shares issued on May 24, 2024. As at June 30, 2024, the Company must incur \$375,309 in eligible exploration expenditures on or before December 31, 2024.

The Company's anticipated general and administrative costs for the twelve months ended December 31, 2024, are outlined in the table below.

General and Administrative Costs	Budgeted costs December 31, 2024	Spent as at June 30, 2024	Difference
Exploration budget (4)	\$nil	\$505,225	(\$505,225)
Consulting fees	\$108,000	\$259,573	(\$151,573)
Insurance	\$15,000	\$6,874	\$8,126
Marketing	\$50,000	\$103,741	(\$53,741)
Office and administration	\$182,000	\$25,340	\$156,660
Professional fees	\$120,000	\$128,763	(\$8,763)
Stock exchange, authorities and communication	\$25,000	\$30,251	(\$5,251)
Total	\$500,000	\$1,059,767	(\$559,767)

Notes:

Unutilized net proceeds of the IPO, Offering, Flow-Through Offering and Unit Offering (together, the "Offerings"), if any, will be invested by the Company in an interest-bearing account with a major Canadian bank and used for working capital requirements. While the Company intends to spend the net proceeds from the Offerings as stated above, there may be circumstances where, for sound business reasons, funds may be re-allocated at the discretion of the Board or management. Upon the completion of the Offerings, the Company's working capital available to fund ongoing operations will be sufficient to meet its administrative costs and exploration expenditures for twelve months.

The Company is an exploration stage company and has not generated cash flow from operations. As of June 30, 2024, the Company had negative cash flow from operating activities. The Company expects to continue to incur negative operating cash flow and losses for the foreseeable future. To the extent that the Company has negative operating cash flow in future periods, it will need to allocate a portion of its cash (including proceeds from the Offerings) to fund such negative cash flow. If the Company experiences future negative cash flow, the Company may also be required to raise additional funds through the issuance of equity or debt securities. See "Risks and Uncertainties" section below.

Related Party Transactions

Key management personnel include those people who have authority and responsibility for planning, directing and controlling the activities of the Company as a whole. The Company has determined that key management personnel consist of executive and non-executive members of the Company's Board of Directors and corporate officers, excluding the Chief Financial Officer ("CFO") and the Corporate Secretary. Beyond was a party to the following transactions with related parties:

⁽⁴⁾ The Company will develop an exploration budget when further financing is sourced.

Proposed Transactions

There is no imminent decision by the Board of Directors of the Company with respect to any transactions beyond what is contemplated in this document. The Company continues to evaluate properties and corporate opportunities to advance its exploration, development and objectives.

Risks and Uncertainties

An investment in the securities of the Company is highly speculative and involves numerous and significant risks. Only investors whose financial resources are sufficient to enable them to assume such risks and who have no need for immediate liquidity in their investment should undertake such investment. Prospective investors should carefully consider the risk factors that have affected, and which in the future are reasonably expected to affect, the Company and its financial position. Please refer to the section entitled "Risks and Uncertainties" in the Company's Annual MD&A for the fiscal year ended December 31, 2023, available on SEDAR+ at www.sedarplus.ca.

Discussion dated: August 29, 2024

Disclosure of Internal Controls

Management has established processes to provide them with sufficient knowledge to support representations that they have exercised reasonable diligence to ensure that (i) the financial statements do not contain any untrue statement of material fact or omit to state a material fact required to be stated or that is necessary to make a statement not misleading in light of the circumstances under which it is made, as of the date of and for the periods presented by the financial statements, and (ii) the financial statements fairly present in all material respects the financial condition, results of operations and cash flow of the Company, as of the date of and for the periods presented.

In contrast to the certificate required for non-venture issuers under National Instrument 52-109, Certification of Disclosure in Issuers' Annual and Interim Filings ("NI 52-109"), the Venture Issuer Basic Certificate does not include representations relating to the establishment and maintenance of disclosure controls and procedures ("DC&P") and internal control over financial reporting ("ICFR"), as defined in NI 52-109. In particular, the certifying officers filing this certificate are not making any representations relating to the establishment and maintenance of:

- (i) controls and other procedures designed to provide reasonable assurance that information required to be disclosed by the issuer in its annual filings, interim filings or other reports filed or submitted under securities legislation is recorded, processed, summarized and reported within the time periods specified in securities legislation; and
- (ii) a process to provide reasonable assurance regarding the reliability of financial reporting and the preparation of the financial statements for external purposes in accordance with the issuer's GAAP (IFRS). The issuer's certifying officers are responsible for ensuring that processes are in place to provide them with sufficient knowledge to support the representations they are making in the certificate. Investors should be aware that inherent limitations on the ability of certifying officers of a venture issuer to design and implement on a cost effective basis DC&P and ICFR as defined in NI 52-109 may result in additional risks to the quality, reliability, transparency and timeliness of interim and annual filings and other reports provided under securities legislation.
