ANNUAL AUDITED FINANCIAL STATEMENTS

YEARS ENDED

DECEMBER 31, 2024 AND 2023

(EXPRESSED IN CANADIAN DOLLARS)

INDEPENDENT AUDITOR'S REPORT

To the Shareholders of
Beyond Lithium Inc.

Report on the Audit of the Financial Statements

Opinion

We have audited the financial statements of Beyond Lithium Inc. (the "Company"), which comprise the statements of financial position as at December 31, 2024, and the statements of loss and comprehensive loss, changes in shareholders' equity, and cash flows for the year then ended, and notes to the financial statements, including material accounting policy information.

In our opinion, the accompanying financial statements present fairly, in all material respects, the financial position of the Company as at December 31, 2024, and its financial performance and its cash flows for the year then ended in accordance with International Financial Reporting Standards ("IFRS").

Basis of Opinion

We conducted our audit in accordance with Canadian generally accepted auditing standards. Our responsibilities under those standards are further described in the *Auditor's Responsibilities for the Audit of the Financial Statements* section of our report. We are independent of the Company in accordance with the ethical requirements that are relevant to our audit of the financial statements in Canada, and we have fulfilled our other ethical responsibilities in accordance with these requirements. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Material Uncertainty Related to Going Concern

We draw attention to note 1 in the financial statements, which indicates that the Company incurred a net loss during the year ended December 31, 2024. As stated in note 1, these events or conditions, along with other matters as set forth in note 1, indicate that a material uncertainty exists that may cast significant doubt on the Company's ability to continue as a going concern. Our opinion is not modified in respect of this matter.

Key Audit Matter

Key audit matters are those matters that, in our professional judgment, were of most significance in our audit of the financial statements of the current period. The matters were addressed in the context of our audit of the financial statements as a whole, and in forming our opinion thereon, and we do not provide a separate opinion on these matters.

Except for the matter of the Material Uncertainty Related to Going Concern described above, we have determined that there are no other key audit matters to communicate in our report.

Other Matter

The financial statements of the Company for the year ended December 31, 2023, were

audited by another auditor who expressed an unmodified opinion on those statements on April 25, 2024.

Other Information

Management is responsible for the other information. The other information comprises the Management's Discussion and Analysis for the year ended December 31, 2024, which we obtained prior to the date of this auditor's report.

Our opinion on the financial statements does not cover the other information and we do not express any form of assurance conclusion thereon.

In connection with our audit of the financial statements, our responsibility is to read the other information and, in doing so, consider whether the other information is materially inconsistent with the financial statements or our knowledge obtained in the audit or otherwise appears to be materially misstated. If, based on the work we have performed, we conclude that there is a material misstatement of this other information, we are required to report that fact. We have nothing to report in this regard.

Responsibilities of Management and Those Charged with Governance for the Financial Statements

Management is responsible for the preparation and fair presentation of the financial statements in accordance with IFRS, and for such internal control as management determines is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, management is responsible for assessing the Company's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless management either intends to liquidate the Company or to cease operations, or has no realistic alternative but to do so.

Those charged with governance are responsible for overseeing the Company's financial reporting process.

Auditor's Responsibilities for the Audit of the Financial Statements

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with Canadian generally accepted auditing standards will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

As part of an audit in accordance with Canadian generally accepted auditing standards, we exercise professional judgment and maintain professional skepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a

basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.

- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Company's internal control.
- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by management.
- Conclude on the appropriateness of management's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Company's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause the Company to cease to continue as a going concern.
- Evaluate the overall presentation, structure and content of the financial statements, including the disclosures, and whether the financial statements represent the underlying transactions and events in a manner that achieves fair presentation.

We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

We also provide those charged with governance with a statement that we have complied with relevant ethical requirements regarding independence, and to communicate with them all relationships and other matters that may reasonably be thought to bear on our independence, and where applicable, related safeguards.

From the matters communicated with those charged with governance, we determine those matters that were of most significance in the audit of the financial statements of the current period and are therefore the key audit matters. We describe these matters in our auditor's report unless law or regulation precludes public disclosure about the matter or when, in extremely rare circumstances, we determine that a matter should not be communicated in our report because the adverse consequences of doing so would reasonably be expected to outweigh the public interest benefits of such communication.

The engagement partner on the audit resulting in this independent auditor's report is Julia Zhou.

Beyond Lithium Inc. (Formerly "Beyond Minerals Inc.")

Notes to Financial Statements

Years Ended December 31, 2024 and 2023

(Expressed in Canadian Dollars)

1. NATURE OF OPERATIONS AND GOING CONCERN

Beyond Lithium Inc. (formerly "Beyond Minerals Inc.") (the "Company") was incorporated on October 8, 2019, under the laws of Canada. The Company is primarily engaged in the business of acquiring and exploring mineral properties.

The head office, principal address, and records office of the Company are located at 360 Main Street, Suite 3000, Winnipeg, Manitoba, R3C 4G1.

The common shares of the Company commenced trading on the Canadian Securities Exchange ("CSE") on April 13, 2022 under the symbol "BY" and on the OTCQB Venture Market on September 9, 2022 under the symbol "BYDMF".

On May 15, 2023, the Company changed its name from "Beyond Minerals Inc." to "Beyond Lithium Inc."

Going Concern

In order to carry out future exploration activities, the Company will need to raise additional financing. Although the Company has been successful in raising funds to date, there can be no assurance that adequate funding will be available in the future, or available under terms favorable to the Company.

These financial statements have been prepared on a going concern basis, which assumes continuity of operations and realization of assets and settlement of liabilities in the normal course of business. However, the Company is exploration-focused and is subject to the risks and challenges of companies in the same sector. These risks include, but are not limited to, the challenges of securing adequate capital given exploration, development and operational risks inherent in the mining industry as well as global economic, precious and base metal price volatility; all of which are uncertain under current market conditions. As a result of these risks, there is no assurance that the Company's funding initiatives will continue to be successful and these financial statements do not reflect the adjustments to the carrying values of assets and liabilities and the reported expenses and financial position classifications that would be necessary were the going concern assumption inappropriate. These adjustments could be material.

The Company has incurred losses in previous years, with net loss of \$1,895,564 for the year ended December 31, 2024 (year ended December 31, 2023 - \$5,837,121) and has an accumulated deficit of \$8,462,156 as at December 31, 2024 (December 31, 2023 - \$6,566,592). The continuing operations of the Company are dependent on its ability to continue to raise adequate financing and to commence profitable operations in the future and repay its liabilities arising from normal operations as they come due. These conditions indicate that material uncertainties exist that may cast significant doubt on the Company's ability to continue as a going concern.

The Company's financial statements were authorized for issue by the Board of Directors (the "Board") on April 29, 2025.

2. BASIS OF PRESENTATION

Statement of Compliance

(a) Statement of Compliance

These financial statements have been prepared in accordance with International Accounting Standards using accounting policies consistent with the International Financial Reporting Standards ("IFRS") issued by the International Accounting Standards Board ("IASB") and Interpretations of the International Financial Reporting Interpretations Committee ("IFRIC").

Beyond Lithium Inc. (Formerly "Beyond Minerals Inc.")

Notes to Financial Statements

Years Ended December 31, 2024 and 2023

(Expressed in Canadian Dollars)

2. BASIS OF PRESENTATION (CONTINUED)

(b) Basis of Measurement

The financial statements have been prepared on a historical cost basis except for financial instruments classified at fair value through profit or loss ("FVTPL") which are stated at fair values. The accounting policies have been applied consistently throughout all periods presented in these financial statements.

(c) Functional and Presentation Currency

The financial statements are presented in Canadian dollars, which is the functional currency of the Company.

(d) Significant Accounting Judgments, Estimates and Assumptions

The preparation of financial statements in conformity with IFRS requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosed of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenue and expenses during the reporting period. Areas requiring significant estimates, judgments and assumptions by management include, but are not limited to:

- Income taxes – Measurement of income taxes payable and deferred income tax assets and liabilities requires management to make judgments in the interpretation and application of the relevant tax laws. The actual amount of income taxes only become final upon filing and acceptance of the tax return by the relevant authorities, which occurs subsequent to the issuance of the financial statements.
- Going concern - Significant judgments are used in the Company's assessment of its ability to continue as a going concern as described in note 1.
- Valuation of share-based payments – The Company records all share based payments and warrants using the fair value method. The Company uses the Black-Scholes model to determine the fair value of stock options, stock appreciation rights, and warrants and broker warrants. The Company uses the share price on the date of grant to determine the fair value of restricted share units. The main factor affecting the estimates of the fair value of stock options, warrants, broker warrants and compensation options is the stock price expected volatility used. The Company currently estimates the expected volatility of its common shares based on the historical volatility of the Company's shares.
- Share issued for non-cash consideration – The Company measures equity-settled share-based payment transactions based on an estimate of the fair value of goods or services received, unless that fair value cannot be estimated reliably, in which case the Company measures the fair value of the goods or services received based on the fair value of the equity instruments granted.
- Stock appreciation right – Management is required to use judgment in determining the classification of stock appreciation rights. The Company determined all share appreciation rights issued during the year are equity instruments.

3. MATERIAL ACCOUNTING POLICIES

(a) Cash and cash equivalents

Cash and cash equivalents comprise cash on hand.

(b) Exploration and evaluation expenditures

Exploration and evaluation expenditures include the costs of acquiring licenses and costs associated with exploration and evaluation activity. Exploration and evaluation expenditures are expensed as incurred except for expenditures associated with the acquisition of exploration and evaluation assets, which are recognized at the fair value at the acquisition date.

Beyond Lithium Inc. (Formerly "Beyond Minerals Inc.")

Notes to Financial Statements

Years Ended December 31, 2024 and 2023

(Expressed in Canadian Dollars)

3. MATERIAL ACCOUNTING POLICIES (CONTINUED)

(b) Exploration and evaluation expenditures (continued)

Once a project has been established as commercially viable and technically feasible, related development expenditure is capitalized. This includes costs incurred in preparing the site for mining operations. Capitalization ceases when the mine is capable of commercial production, with the exception of development costs which give rise to a future benefit.

(c) Income taxes

Income tax on the profit or loss for the period presented comprises current and deferred tax. Income tax is recognized in profit or loss except to the extent that it relates to items recognized directly in equity, in which case it is recognized in equity.

Current tax expense is the expected tax payable on the taxable income for the period, using tax rates enacted or substantively enacted at period end, adjusted for amendments to tax payable with regards to previous periods.

Deferred tax is recorded for temporary differences, between the carrying amounts of assets and liabilities for financial reporting purposes and the amounts used for taxation purposes. Deferred income taxes are recorded to recognize tax benefits only to the extent, based on available evidence, that it is probable that they will be realized. The following temporary differences are not provided for: goodwill not deductible for tax purposes; and the initial recognition of assets or liabilities that affect neither accounting nor taxable loss.

The amount of deferred tax provided is based on the expected manner of realization or settlement of the carrying amount of assets and liabilities, using tax rates expected to be applied to temporary differences which may reverse, based on tax laws, enacted or substantively enacted at the statement of financial position date.

Deferred tax assets and liabilities are offset when there is a legally enforceable right to set off current tax assets against current tax liabilities and when they relate to income taxes levied by the same taxation authority and the Company intends to settle its current tax assets and liabilities on a net basis.

(d) Warrant and share-based compensation

The Company grants stock options to buy common shares of the Company to employees, consultants, directors and officers. The Company may also issue warrants to agents as finders' fees. The Company recognizes share-based compensation expense based on the estimated fair value of the warrants and stock options. A fair value measurement is made for each vesting instalment within each warrant and stock option grant and is determined using the Black-Scholes option-pricing model. The fair value of the warrants and stock options is recognized over the vesting period of the warrant and stock option granted as either share-based compensation expense, or as share issuance costs when awarded to agents as finders' fees, with a corresponding amount recognized for each of share-based compensation and share issuance costs, in reserves. This measurement includes a forfeiture estimate, which is revised for actual forfeitures in subsequent periods. The reserves account is subsequently reduced if the warrants and stock options are exercised and the amount initially recorded is then credited to share capital.

Charges for options or warrants that are cancelled or expire are reclassified from reserves to deficit. In addition, where the terms of a stock option or warrant are modified, the minimum expense recognized is the expense as if the terms had not been modified. An additional expense is recognized for any modification which increases the total fair value of the share-based compensation arrangement, or is otherwise beneficial to the employee as measured at the date of modification over the remaining vesting period.

Beyond Lithium Inc. (Formerly "Beyond Minerals Inc.")

Notes to Financial Statements

Years Ended December 31, 2024 and 2023

(Expressed in Canadian Dollars)

3. MATERIAL ACCOUNTING POLICIES (CONTINUED)

(d) Warrant and share-based compensation (continued)

In situations where equity instruments are issued to non-employees and the fair value of some or all of the goods or services received by the entity as consideration cannot be estimated reliably, they are measured at the fair value of the share-based payment. Otherwise, share-based payments are measured at the fair value of goods or services received.

(e) Stock appreciation right ("SAR")

Under the Omnibus Equity Incentive Plan (the "Equity Incentive Plan"), employees, consultants, directors and officers of the Company are granted SARs where each SAR entitles the recipient to receive a payment in common shares (or, at the election of the holder and subject to the approval of the plan administrator, a cash amount in respect thereof) equal to the current market price less the grant price of the SAR as determined by the Board at the time of the grant for each SAR. The fair value is measured at the grant date and recognized over the period during which the SARs vest. The fair value of the SARs granted is measured using the Black-Scholes option pricing model, taking into account the terms and conditions upon which the options were granted. At each financial position reporting date, the amount recognized as an expense (share-based compensation) is adjusted to reflect the actual number of SARs that are expected to vest.

(f) Restricted stock unit ("RSU")

Under the Equity Incentive Plan, employees, consultants, directors and officers of the Company are granted RSUs where each RSU has a value equal to one common share. The fair value of RSU were determined by the Company's share price on the date of the award and recorded in accordance with the vesting provisions and included as part of share-based compensation in the statements of loss and comprehensive loss for the period.

(g) Basic and diluted loss per share

Basic loss per share is based on the weighted average number of common shares of the Company outstanding during the period. The diluted loss per share reflects the potential dilution of common share equivalents, such as outstanding share options, restricted share unit's and warrants, in the weighted average number of common shares outstanding during the period, if dilutive.

(h) Share capital

Common shares are classified as equity. Transaction costs directly attributable to the issuance of common shares and share warrants are recognized as a deduction from equity, net of any tax effects.

The residual value method is used to calculate the fair value of the warrant component of units issued, whereby the residual value resulting from the private placement proceeds less the fair value of the share component is assigned as the fair value of the warrants. Under this method, the proceeds are allocated first to share capital based on the fair value as determined by the quoted bid price of the common shares and any residual value is allocated to the warrants reserves.

Flow-through shares

The Company finances a portion of its exploration activities through the issue of flow-through shares issued pursuant to the Canadian Income Tax Act ("Tax Act").

Proceeds received from the issuance of flow-through shares are restricted to be used only for qualifying Canadian exploration and development expenses (as defined in the Tax Act).

Beyond Lithium Inc. (Formerly "Beyond Minerals Inc.")

Notes to Financial Statements

Years Ended December 31, 2024 and 2023

(Expressed in Canadian Dollars)

3. MATERIAL ACCOUNTING POLICIES (CONTINUED)

(h) Share capital (continued)

Flow-through shares (continued)

Pursuant to the terms of the flow-through share subscription agreements, these shares transfer the tax deductibility of qualifying expenditures to flow-through investors. On issuance, the Company allocates a portion of the subscription proceeds as a flow-through share premium, equal to the estimated premium, if any, that investors pay for the flow-through feature, which is recognized as a premium liability. As expenditures are incurred and applied against the Company's associated flow-through commitment, the premium liability is reduced proportionately, charged as a deferred income tax recovery in operations.

A deferred income tax liability is recognized for the estimated foregone tax benefit as a result of the renunciation to the shareholders, offset as a deferred income tax expense, to the extent no deferred income tax assets are on hand and eligible to offset. The Company considers renunciation to have occurred when reported for income tax purposes.

(i) Provisions

Provisions are recognized when the Company has a present obligation (legal or constructive) that has arisen as a result of a past event and it is probable that a future outflow of resources will be required to settle the obligation, provided that a reliable estimate can be made of the amount of the obligation.

Provisions are measured at the present value of the expenditures expected to be required to settle the obligation using a pre-tax rate that reflects current market assessments of the time value of money and the risk specific to the obligation. The increase in the provision due to passage of time is recognized as interest expense.

(j) Financial instruments

Financial assets and financial liabilities are recognized when the Company becomes a party to the contractual provisions of the financial instrument.

Below is a summary showing the classification and measurement bases of the Company's financial instruments.

Classification	IFRS 9
Cash and cash equivalents	FVTPL
Marketable securities	FVTPL
Flow-through share liability	Amortized Cost
Accounts payable and other liabilities	Amortized Cost

Financial assets

Financial assets are classified as either financial assets at FVTPL, amortized cost, or FVTOCI. The Company determines the classification of its financial assets at initial recognition.

Financial assets recorded at FVTPL

Financial assets are classified as FVTPL if they do not meet the criteria of amortized cost or FVTOCI. Gains or losses on these items are recognized in profit or loss.

(j) Financial instruments (continued)

Investments recorded at fair value through other comprehensive income (FVOCI)

On initial recognition of an equity investment that is not held for trading, the Company may irrevocably elect to measure the investment at FVOCI whereby changes in the investment's fair value (realized and unrealized) will be recognized permanently in OCI with no reclassification to profit or loss. The election is made on an investment-by-investment basis.

Amortized cost

Financial assets are classified as measured at amortized cost if both of the following criteria are met and the financial assets are not designated as at FVTPL: 1) the object of the Company's business model for these financial assets is to collect their contractual cash flows, and 2) the asset's contractual cash flows represent "solely payments of principal and interest".

Financial liabilities

Financial liabilities are classified as either financial liabilities at FVTPL or at amortized cost. The Company determines the classification of its financial liabilities at initial recognition.

Amortized cost

Financial liabilities are classified as measured at amortized cost unless they fall into one of the following categories: financial liabilities at FVTPL, financial liabilities that arise when a transfer of a financial asset does not qualify for derecognition, financial guarantee contracts, commitments to provide a loan at a below-market interest rate, or contingent consideration recognized by an acquirer in a business combination.

Financial liabilities recorded FVTPL

Financial liabilities are classified as FVTPL if they fall into one of the five exemptions detailed above.

Transaction costs

Transaction costs associated with financial instruments, carried at FVTPL, are expensed as incurred, while transaction costs associated with all other financial instruments are included in the initial carrying amount of the asset or the liability.

Subsequent measurement

Instruments classified as FVTPL are measured at fair value with unrealized gains and losses recognized in profit or loss. Instruments classified as amortized cost are measured at amortized cost using the effective interest rate method. Instruments classified as FVTOCI are measured at fair value with unrealized gains and losses recognized in other comprehensive income.

Derecognition

The Company derecognizes financial liabilities only when its obligations under the financial liabilities are discharged, cancelled, or expired. The difference between the carrying amount of the financial liability derecognized and the consideration paid and payable, including any non-cash assets transferred or liabilities assumed, is recognized in profit or loss.

3. MATERIAL ACCOUNTING POLICIES (CONTINUED)

(j) Financial instruments (continued)

Financial instruments at fair value through profit and loss

Financial instruments recorded at fair value on the statements of financial position are classified using a fair value hierarchy that reflects the significance of the inputs used in making the measurements. The fair value hierarchy has the following levels:

- Level 1 - valuation based on quoted prices (unadjusted) in active markets for identical assets or liabilities;
- Level 2 - valuation techniques based on inputs other than quoted prices included in Level 1 that are observable for the asset or liability, either directly (i.e. as prices) or indirectly (i.e. derived from prices); and
- Level 3 - valuation techniques using inputs for the asset or liability that are not based on observable market data (unobservable inputs).

The carrying amount reflected above represents the Company's maximum exposure to credit risk for the other receivables. As at December 31, 2024 and 2023, the Company did not hold financial instruments recorded at fair value that would require classification within the fair value hierarchy, except for cash and cash equivalents, and marketable securities (Level 1). The carrying value of the financial instruments noted above approximate their fair value due to the short-term nature of these instruments. The carrying value of accounts payable and other liabilities also approximates its fair value.

(k) Impairment

The carrying amounts of the Company's non-financial assets, other than deferred tax assets, are reviewed at each reporting date to determine whether there is any indication of impairment. If any such indication exists, then the asset's recoverable amount is estimated.

For the purpose of impairment testing, assets are grouped together into the smallest group of assets that generates cash inflows from continuing use that are largely independent of the cash inflows of other assets or groups of assets (the "cash-generating unit").

An impairment loss is recognized if the carrying amount of a cash-generating unit exceeds its estimated recoverable amount. The recoverable amount of an asset or a cash-generating unit is the greater of its value in use and its fair value less costs of disposal. In assessing value in use, the estimated future cash flows are discounted to their present value using a pre-tax discount rate that reflects current market assessment of the time value of money and the risks specific to the assets. Impairment losses are recognized in net loss.

Impairment losses recognized in prior periods are assessed at each reporting date for any indications that the loss has decreased or no longer exists. An impairment loss is reversed if there has been a change in the estimates used to determine the recoverable amount. An impairment loss is reversed only to the extent that the asset's carrying amount does not exceed the carrying amount that would have been determined, net of depreciation, if no impairment loss had been recognized.

(l) New accounting standards adopted

Certain pronouncements were issued by the IASB or the IFRIC that are mandatory for accounting periods commencing on or after January 1, 2024. Many are not applicable or do not have a material impact to the Company and have been excluded. The Company has adopted the following policy effective January 1, 2024.

3. MATERIAL ACCOUNTING POLICIES (CONTINUED)

(l) New accounting standards adopted (continued)

IAS 1, Presentation of Financial Statements ("IAS 1")

IAS 1 was amended in January 2020 to provide a more general approach to the classification of liabilities under IAS 1 based on the contractual arrangements in place at the reporting date. The amendments clarify that the classification of liabilities as current or non-current is based solely on a company's right to defer settlement at the reporting date. The right needs to be unconditional and must have substance. The amendments also clarify that the transfer of a company's own equity instruments is regarded as settlement of a liability, unless it results from the exercise of a conversion option meeting the definition of an equity instrument. The amendments are effective for annual periods beginning on January 1, 2024. There was no material impact to the Company.

(m) Accounting standards issued but not yet effective

Certain pronouncements were issued by the IASB or the IFRIC that are mandatory for accounting periods commencing on or after January 1, 2025. There are no relevant IFRS's or IFRS interpretations that are not yet effective that would be expected to have a material impact on the financial statements.

4. FINANCIAL RISK MANAGEMENT

The Company manages its exposure to a number of different financial risks arising from operations as well as from the use of financial instruments, including market risks (foreign currency exchange rate and interest rate), credit risk and liquidity risk, through its risk management strategy. The objective of the strategy is to support the delivery of the Company's financial targets while protecting its future financial security and flexibility. Financial risks are primarily managed and monitored through operating and financing activities. The Company does not use derivative financial instruments.

The financial risks are evaluated regularly with due consideration to changes in key economic indicators and to up-to-date market information. The Company's risk exposures and the impact on the Company's financial instruments are summarized below:

(a) Credit Risk

Credit risk is the financial risk of non-performance of a contracted counter party. The Company's credit risk is primarily attributable to cash and cash equivalents. The Company reduces its credit risk by maintaining its cash with reputable financial institutions.

(b) Liquidity Risk

Liquidity risk is the risk that the Company will not be able to meet its obligations associated with financial liabilities as they come due. The Company's investment policy is to invest its excess cash in high grade investment securities with varying terms to maturity, selected with regard to the expected timing of expenditures for continuing operations. The Company monitors its liquidity position and budgets future expenditures, in order to ensure that it will have sufficient capital to satisfy liabilities as they come due.

As at December 31, 2024, the Company had current liabilities of \$230,080 (December 31, 2023 - \$207,201) and has cash of \$44,503 (December 31, 2023 - \$76,288) to meet its current obligations (see note 1 for going concern). The Company regularly evaluates its cash position to ensure preservation and security of capital as well as maintenance of liquidity.

4. FINANCIAL RISK MANAGEMENT (CONTINUED)

(c) Market Risk

Interest Rate Risk

Interest rate risk is the risk that the fair value of future cash flows of a financial instrument will fluctuate due to changes in market interest rates. The Company has no significant risk to future cash flows from interest rate risk. The Company does not use derivative instruments to reduce its exposure to interest rate risk.

5. CAPITAL MANAGEMENT

The Company considers its capital to be shareholders' equity which comprises share capital, contributed surplus and deficit, which as at December 31, 2024, totaled an equity of \$35,339 (December 31, 2023 - \$221,765).

The Company's objective when managing capital is to maintain adequate levels of funding to support its exploration activities and to maintain corporate and administrative functions necessary to support operational activities.

The Company manages its capital structure in a manner that provides sufficient funding for operational activities. Funds are primarily secured through equity capital raised by way of private placements. There can be no assurance that the Company will be able to continue raising equity capital in the future.

The Company invests all capital that is surplus to its immediate operational needs in short-term, liquid and highly rated financial instruments, such as cash and other short-term guaranteed deposits, and all are held in major financial institutions. There were no changes to the Company's approach to capital risk management during the year.

6. MARKETABLE SECURITIES

On January 10, 2024, the Company entered into a mineral property option agreement (the "Option Agreement") with Extreme Exploration Inc. (the "Optionee"), pursuant to which the Company has granted the Optionee an exclusive option to acquire (the "Option") an undivided 100% interest in its non-core Fabie Gold project located approximately 35 km northwest of Rouyn-Noranda, Quebec (the "Fabie Gold Project"). Extreme Exploration Inc. is a Vancouver based private exploration company.

The Fabie Gold Project is intended to serve as the Optionee's qualifying property for a going public transaction to be carried out as an initial public offering, reverse takeover, or other transaction structure which results in the Optionee's common shares becoming listed, or being exchanged for shares which are listed, on a recognized Canadian stock exchange (a "Going Public Transaction").

Exercise of the Option by the Optionee is subject to the Optionee satisfying the following conditions:

- completing a Going Public Transaction within 18 months of the date of the Option Agreement (the "Effective Date");
- issuing to the Company an aggregate of 1,000,000 common shares in the capital of the Optionee upon closing of the Going Public Transaction, subject to certain contractual escrow requirements;
- reimbursing the Optionor for its costs associated with the exploration of the Fabie Gold Project in the amount of C\$150,000 cash as follows:
 - (i) \$50,000 to be paid on the earlier of (A) 90 days from the Effective Date or (B) closing of the Optionee's first debt or equity financing transaction completed following the Effective Date (received);
 - (ii) \$100,000 to be paid on or prior to completion of the Going Public Transaction; and
- assuming the 1.0% net smelter return royalty obligation of the Company in respect of the Fabie Gold Project in favour of Reyna Silver Corp. upon exercise of the Option.

In August 2024, the Company received cash payment of \$50,000 from the Optionee and recorded it as a gain on sale of mineral property.

In 2023, the Company's Board approved the Equity Incentive Plan, which included SARs. Employees, consultants, directors and officers of the Company are eligible to receive grants of SARs, entitling the recipient to receive a payment in common shares equal to the current market price less the grant price of the SAR as determined by the Board at the time of the grant for each SAR. Notwithstanding the foregoing, the Board may, in its sole discretion, satisfy payment of the entitlement in cash rather than in common shares, or a combination of common shares and cash. All SARs issued during the year ended December 31, 2024 will be settled by common shares of the Company, and have been classified as equity settled share-based compensation and presented in equity. The exercise price of the SAR (the "SAR Grant Price") shall be determined by the Board at the time the SAR is granted. In no event shall the SAR Grant Price be lower than the discounted market price permitted by the CSE. SARs shall be granted on such terms as shall be determined by the Board and set out in the award agreement, including any terms pertaining to vesting and settlement.

The following table reflects the continuity of SARs for the years ended December 31, 2024 and 2023:

	Number of SARs	Weighted Average Exercise Price
Balance, December 31, 2022	-	\$ -
Granted (i)(ii)	1,450,000	0.33
Balance, December 31, 2023 and December 31, 2024	1,450,000	\$ 0.33
